DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to **a single paragraph** on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

In particular, the abstract of the instant application has two paragraphs.

2. The disclosure is objected to because of the following informalities: the clean copy of the substitute specification filed with the preliminary amendment on 4/19/01 is not consistent with the marked-up copy (see page 5 of the clean copy). The applicant is also reminded that the substitute specification does not contain page number.

Therefore, the substitute specification has not been entered.

Further, the specification is objected because the specification does not contain section headings.

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Claim Objections

3. Claims 11-17 are objected to because of the following informalities:

Regarding claim 11, it is suggested changing "channel estimation" in line 1 to --- channel impulse response estimation --- so as to provide proper antecedent basis for the limitation "the channel impulse response" in line 8.

Regarding claim 12, "the soft feedback" in line 4 should be changed to --- the soft output feedback ---.

Regarding claim 13, "spread the symbols" in line 2 should be changed to --- spread the data and pilot symbols" so as to avoid indefinite problem.

Regarding claim 14, it is suggested changing "channel estimation" in line 1 to --- channel impulse response estimation --- so as to provide proper antecedent basis for the limitation "the channel impulse response" in line 6.

Regarding claim 17, "an in coming signal" in line 4 should be changed to --- an incoming signal ---.

Appropriate correction is required.

Allowable Subject Matter

4. Claim 18 is allowed. Claims 11-17 would be allowable if they are rewritten to overcome the claim objections above.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lomp (U.S. Patent No. 6,697,350), Bahai et al. (U.S. Patent No. 6,275,525), Miya (U.S. Patent No. 6,175,558), Okawa et al. (U.S. Patent No. 6,097,711), Thielecke et al. (U.S. Patent No. 5,719,899).

6. This application is in condition for allowance except for the following formal matters:

Claim and specification objections.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
